

# Kan Izumi

Izumi's activities are focused on the theme of rejuvenating physical sensations through scent. Cultivating and distilling plants, and researching raw materials, Izumi's creative work is inspired by the five senses. Along with his work as an artist, Izumi established Olfactive Studio Ne to design scent-based experiences. In addition to overseeing the composition of scents, Izumi and his team strive to expand the possibilities of expressing the world through scent.
