

古澤龍/**Ryu Furusawa**

CV

Ryu Furusawa is an artist based in Tokyo and Chiba. Through the manipulation of the medium and the viewing environment itself, he seeks to generate an ambiguous state across the picture plane, in which the boundary between subjectivity and objectivity wavers. Recent practice centers on an approach that combines recorded moving images with digital coordinate transformation to rewrite the time and space within them. Through the medium's capacity to imitate temporal experience and interventions into its structure, he continues to explore alternative ways of grasping the perception of time and space—frameworks that have been formed and taken for granted by the institutions and conventions of visual media.

Selected awards include Honorary Mention, Prix Ars Electronica 2024 and the 25th Japan Media Arts Festival Art Division Jury Selection. Selected exhibitions include mission ∞ infinity | space + quantum + art (Museum of Contemporary Art Tokyo, 2026), Rear Window & Real Wonder (HOW Art Museum, Shanghai, 2025), and ICC Annual 2024 (NTT InterCommunication Center, Tokyo, 2024). He is also a member of the artist collective YOF.
